## Table of contents

|           |   |    |
|-----------|---|----|
| Chapter 1 | General introduction.....                                 | 1  |
| 1.1       | Wood as a raw material.....                               | 1  |
| 1.1.1     | Wood composition and ultra-structure .....                | 1  |
| 1.1.2     | Natural properties of wood.....                           | 3  |
| 1.1.3     | The need for wood modification .....                      | 7  |
| 1.2       | Thermal modification of wood.....                         | 8  |
| 1.2.1     | Thermal modification processes in Europe.....             | 8  |
| 1.2.2     | Macro- and micro-structural defects .....                 | 10 |
| 1.2.3     | Changes in chemical composition and ultra-structure ..... | 12 |
| 1.2.4     | Mass loss by thermal modification .....                   | 14 |
| 1.2.5     | Water-related properties.....                             | 15 |
| 1.2.6     | Dimensional changes .....                                 | 17 |
| 1.2.7     | Mechanical properties .....                               | 18 |
| 1.2.8     | Biological durability.....                                | 20 |
| 1.2.9     | Weathering and coating performance.....                   | 21 |
| 1.3       | Scope of this thesis .....                                | 23 |
| 1.4       | List of publications in peer-reviewed journals .....      | 24 |
| 1.5       | Other publications on thermally modified wood.....        | 25 |
| Chapter 2 | Publication I.....  | 27 |
| 2.1       | Introduction .....  | 28 |
| 2.2       | Material and methods .....                                | 30 |
| 2.2.1     | Material.....   | 30 |
| 2.2.2     | Thermal modification process .....                        | 30 |
| 2.2.3     | Methods .....   | 32 |
| 2.3       | Results and discussion .....                              | 34 |
| 2.4       | Conclusions .....   | 41 |
| Chapter 3 | Publication II.....                                       | 43 |
| 3.1       | Introduction .....  | 44 |
| 3.2       | Material and methods .....                                | 46 |
| 3.2.1     | Material.....   | 46 |
| 3.2.2     | Thermal modification (TM) process.....                    | 46 |
| 3.2.3     | Sorption test on solid samples .....                      | 47 |

---

|           |  |    |
|-----------|--|----|
| 3.2.4     | Sorption test on wood particles (via DVS).....                   | 48 |
| 3.2.5     | Mechanical properties .....                                      | 48 |
| 3.3       | Results and discussion .....                                     | 50 |
| 3.3.1     | Hygroscopicity .....   | 50 |
| 3.3.2     | Mechanical properties .....                                      | 54 |
| 3.4       | Conclusions .....  | 56 |
| Chapter 4 | Publication III .....  | 57 |
| 4.1       | Introduction .....   | 58 |
| 4.2       | Material and methods .....                                       | 60 |
| 4.2.1     | Material and treatment process.....                              | 60 |
| 4.2.2     | Chemical analyses.....   | 61 |
| 4.2.3     | Mass loss and moisture content.....                              | 62 |
| 4.2.4     | Maximum swelling and equilibrium moisture content.....           | 62 |
| 4.2.5     | Dynamic vapor sorption .....                                     | 63 |
| 4.3       | Results and discussion .....                                     | 63 |
| 4.3.1     | Change in MC and mass loss during the process.....               | 63 |
| 4.3.2     | Maximum swelling and hygroscopicity tested on solid samples..... | 65 |
| 4.3.3     | Hygroscopicity tested on wood particles .....                    | 69 |
| 4.4       | Conclusions .....  | 70 |
| Chapter 5 | Publication IV.....  | 71 |
| 5.1       | Introduction .....   | 72 |
| 5.2       | Materials and methods.....                                       | 74 |
| 5.2.1     | Wood materials and thermal modification .....                    | 74 |
| 5.2.2     | Macroscopic evaluation .....                                     | 75 |
| 5.2.3     | Light microscopy .....   | 76 |
| 5.2.4     | Scanning electron microscopy.....                                | 76 |
| 5.2.5     | Wetting cycles .....   | 76 |
| 5.3       | Results and Discussion.....                                      | 76 |
| 5.3.1     | Macroscopic evaluation .....                                     | 76 |
| 5.3.2     | Microscopic observations .....                                   | 79 |
| 5.3.3     | Wetting cycles .....   | 81 |
| 5.4       | Conclusions .....  | 84 |
| 5.5       | Acknowledgements .....   | 84 |
| Chapter 6 | Publication V.....   | 85 |
| 6.1       | Introduction .....   | 86 |

---

## Table of contents

---

|                        |  |     |
|------------------------|--|-----|
| 6.2                    | Materials and methods.....   | 87  |
| 6.3                    | Results and discussion .....   | 86  |
| 6.3.1                  | FT-IR spectroscopy .....   | 88  |
| 6.3.2                  | Micro-tensile strength testing .....   | 90  |
| 6.4                    | Conclusions .....  | 93  |
| 6.5                    | Acknowledgements .....   | 93  |
| Chapter 7              | Publication VI.....  | 95  |
| 7.1                    | Introduction .....   | 96  |
| 7.2                    | Material and methods .....   | 98  |
| 7.2.1                  | Material.....  | 98  |
| 7.2.2                  | Material characteristics.....  | 99  |
| 7.2.3                  | Coating performance .....  | 100 |
| 7.3                    | Results and discussions.....   | 101 |
| 7.3.1                  | Characteristics of thermally modified wood as a substrate.....                           | 101 |
| 7.3.2                  | Microscopic observations .....   | 105 |
| 7.3.3                  | Adhesion strength.....   | 107 |
| 7.4                    | Conclusions .....  | 109 |
| 7.5                    | Acknowledgements .....   | 110 |
| Chapter 8              | General discussion .....   | 111 |
| 8.1                    | Improving wood properties by thermal modification in closed reactor systems (I-III)..... | 111 |
| 8.1.1                  | Thermal degradation at elevated water vapor pressure .....                               | 111 |
| 8.1.2                  | Properties of wood thermally modified at elevated water vapor pressure .....             | 114 |
| 8.2                    | Surface performance of wood thermally modified in open reactor systems (IV-VI) .....     | 122 |
| References.....        |  | 129 |
| Curriculum vitae ..... |  | 149 |
