Contents

List of Symbols **xv**

1 Introduction **1**
1.1 Motivation and Background . . . 3
1.2 Scope of this Work . . . 4

2 State of the Art **5**
2.1 Propellant Management Devices . . . 5
2.2 Current State of Understanding . . . 7
2.3 Open Channel Flow Stability Criteria . . . 11
2.3.1 Flow Rate Limitation of Steady Flow . . . 12
2.3.2 Flow Rate Limitation of Unsteady Flow . . . 14
2.4 Limitation of Ground Based Experiments . . . 15
2.5 Experiments in Microgravity . . . 16
2.6 Capillary-driven Flow in Terrestrial Applications . . . 17
2.7 Computational Fluid Dynamics . . . 18
2.7.1 Interface Tracking . . . 19
2.7.2 Two-Phase Simulations With OpenFOAM . . . 20

3 Modeling the Flow in the Capillary Channel **23**
3.1 Basic Equations . . . 26
3.2 Modeling of the Free Liquid Surface . . . 27
3.3 Pressure Losses . . . 32
3.4 Dimensionless Model . . . 36
3.5 Transient Flow Stability Model . . . 40
3.5.1 Transient Stability Limit . . . 41
3.5.2 Augmented Stabilization (Flexibility Effect) . . . 42
3.5.3 The Feedback Effect of the Fluid Loop . . . 43
3.5.4 Formulation of the Transient Stability Model . . . 43

4 CCF Experiment on ISS **47**
4.1 Experimental Setup . . . 48
4.1.1 Hardware . . . 48
4.1.2 Image Acquisition and Evaluation . . . 53
4.1.3 Software . . . 54
4.2 Operational Scenarios . . . 55
4.3 Experimental Uncertainties . . . 57
4.4 Experiment Summary . . . 57

5 Numerical Tools **61**
5.1 ccFlow (One-dimensional) . . . 62
5.2 OpenFOAM (Three-dimensional) . . . 65

6 Steady Flow Results **69**
6.1 Stable and Unstable Flow . . . 69
6.2 Critical Flow Rate . . . 73
6.2.1 Influence of the Flow Development State . . . 76
6.2.2 Influence of the Characteristic Numbers . . . 77
6.3 Free Surface Contours . . . 78
6.3.1 Reproducibility . . . 81
6.3.2 Comparison with the Mathematical Model . . . 86
6.3.3 Minimum Contour Point . . . 90
6.3.4 Parametric Study . . . 92
6.4 Weaknesses of the Mathematical Model . . . 92

7 General Behavior of Free Surfaces **95**
7.1 Static Solution . . . 95
7.2 Dynamic Solution . . . 100
7.2.1 Flow Rate Variation . . . 100
7.2.2 Channel Length Variation . . . 104
7.3 Physical Flow Regimes . . . 106

8 Transient Flow Results **111**
8.1 Stability Diagrams . . . 114
8.1.1 Scaling of the Stability Diagrams . . . 117
8.2 Parametric study . . . 117

9 Three-Dimensional Computations **121**
9.1 Flow In Straight Tube - Solver Validation . . . 122

9.1.1 Computational Domain . . . 122
9.1.2 Results . . . 124
9.1.3 Conclusions . . . 126
9.2 Flow in the CCF Setup . . . 127
9.2.1 Computational Domain . . . 127
9.2.2 Results . . . 131

10 Conclusions **139**

A CCF Experiment **145**
A.1 Test Fluid . . . 145
A.2 Software . . . 146

B CCF Experiment Results **149**
B.1 Critical Flow Rate . . . 149
B.2 HSHR Camera Images . . . 152
B.3 MSG Camera View . . . 152
B.4 Symmetry in the Free Surface Contours . . . 153
B.5 Flexibility Function - Transient Stability Model . . . 153

C ccFlow Results **159**
C.1 Critical Flow Rate . . . 159

D OpenFOAM **163**
D.1 simpleFOAM Input Files - Cylindrical Tube . . . 163
D.2 Cluster - Technical Specification . . . 167
D.3 Velocity Distribution . . . 167

List of Figures **169**

List of Tables **179**

Bibliography **183**
