Table of contents

Preliminary remarks.....	i
List of abbreviations.....	i
List of publications	III
Conferences	IV
Declaration of contribution as co-author	V
Chapter 1	1
General introduction	1
1 Need for new and natural bio-functional and techno-functional compounds .	1
2 Nature as a source of bioactive compounds	2
3 Plant family Anacardiaceae.....	9
4 Genus <i>Schinus</i> L.....	11
5 Techniques to obtain and characterize bioactive phenolics	17
6 Aims of this thesis	24
Chapter 2	33
Characterization of Phenolic Compounds in Brazilian Pepper (<i>Schinus terebinthifolius</i> Raddi) Exocarp	33
1 Introduction	34
2 Materials and methods	34
3 Results and discussion	38
Acknowledgments.....	49
Supporting information.....	49

Chapter 3	55	
Differentiation of Brazilian Peppertree (<i>Schinus terebinthifolius</i> Raddi) and Peruvian Peppertree (<i>Schinus molle</i> L.) Fruits by UHPLC–UV–MS Analysis of Their Anthocyanin and Biflavonoid Profiles		55
1 Introduction	56	
2 Material and methods.....	57	
3 Results and discussion	61	
Acknowledgments.....	74	
Chapter 4	78	
Pressurized liquid extraction of anthocyanins and biflavonoids from <i>Schinus terebinthifolius</i> Raddi: A multivariate optimization.....		78
1 Introduction	79	
2 Material and methods.....	80	
3 Results and discussion	84	
4 Conclusion	93	
Supplementary data.....	93	
Chapter 5	99	
Concluding remarks.....	99	
1 Polyphenol profiles of <i>Schinus</i> species fruits	100	
2 Phytochemical differentiation of <i>Schinus</i> species.....	102	
3 Chemotaxonomic implications and features of the Anacardiaceae	103	
4 Multivariate optimization of extract yield based on identified polyphenols.	105	
5 Recovery of purified and isolated bioactive polyphenols.....	106	
6 Potential of <i>Schinus terebinthifolius</i> as a source of bioactive and antimicrobial agents.....	107	
Summary	116	
Zusammenfassung.....	118	

Acknowledgement.....	121
Curriculum Vitae.....	123
