Table of Contents

List of Tables.....	3
List of Figures.....	6
List of Abbreviations.....	11
1 Introduction.....	12
2 Materials and Methods.....	16
2.1 Research location and participants.....	16
2.1.1 Selection of villages	16
2.1.2 Selection of women.....	17
2.2 Data collection.....	18
2.2.1 Individual interviews.....	18
2.2.2 Health status.....	19
2.3 Data analysis.....	22
2.3.1 Individual interviews.....	23
2.3.2 Health status.....	32
2.3.3 Correlation and multiple regression analysis.....	32
2.4 Constraints.....	34
3 Results.....	36
3.1 Socio-economic status.....	36
3.1.1 Age, ethnicity, religion and family situation.....	36
3.1.2 Education, occupation and village location.....	38
3.1.3 Wealth parameters.....	40
3.2 Vegetable production.....	41
3.2.1 Vegetable types produced.....	41
3.2.2 Number of vegetables produced per person.....	43
3.2.3 Sales and purchase of vegetables.....	49
3.3 Food consumption.....	53
3.3.1 Food intake.....	53
3.3.2 Nutrient intake.....	60
3.3.3 Dietary Diversity Score (DDS) and Food Variety Score (FVS)	66
3.3.4 Vegetable consumption and Vegetable Diversity Score (VDS).....	74
3.3.5 Dietary patterns.....	82
3.4 Nutritional health.....	94
3.4.1 Vitamin A status.....	94
3.4.2 Iron status.....	96
3.4.3 Body mass index (BMI).....	100
3.4.4 Nutritional knowledge and attitudes.....	102
4 Discussion.....	110
4.1 Linking vegetable production and consumption: “Does diversity in the field equal diversity on the plate?”.....	112
4.1.1 Vegetable production and consumption of the study population.....	112
4.1.2 Attitudes and knowledge of participants regarding vegetables.....	122
4.1.3 Vegetable production and consumption in associations and correlations.....	122
4.1.4 Conclusions.....	136

FOCUS A: The success story of tomatoes and onions.....	138
4.2 Linking overweight/obesity, food consumption and attitudes: “how the 'nutrition transition' is on the rise in rural Tanzania”.....	140
4.2.1 Body Mass Index (BMI) values of the study population.....	140
4.2.2 Attitudes towards overweight.....	142
4.2.3 BMI in associations and correlations.....	144
4.2.4 Conclusions.....	149
FOCUS B: Obesity in developing countries.....	152
4.3 Linking iron status, food consumption and nutritional knowledge: “dietary diversity vs. health issues“.....	153
4.3.1 Iron status of the study population.....	153
4.3.2 Knowledge about iron in nutrition.....	154
4.3.3 Iron in associations and correlations.....	155
4.3.4 Conclusions.....	160
4.4 Linking vitamin A status, food consumption and nutritional knowledge: “food taste versus nutritional knowledge and education”.....	162
4.4.1 Vitamin A status of the study population.....	162
4.4.2 Knowledge about vitamin A in nutrition.....	164
4.4.3 Vitamin A in associations and correlations.....	166
4.4.4 Conclusions.....	168
FOCUS C: Conjunctival Impression Cytology.....	170
4.5 Dietary diversity score (DDS) and food variety score (FVS): „measuring dietary diversity and the association between nutritional diversity and nutritional health“.....	172
4.5.1 DDS and FVS of the study population.....	172
4.5.2 Dietary scores in associations and correlations.....	173
4.5.3 Conclusions.....	179
4.6 Dietary patterns and their association with nutritional health: “the strength and weaknesses of pattern analysis”.....	181
4.6.1 Dietary patterns generated through principal component analysis.....	181
4.6.2 Dietary patterns generated through cluster analysis.....	191
4.6.3 Conclusions.....	193
5 Overall conclusions and outlook.....	197
6 Summary.....	202
7 Zusammenfassung.....	203
8 Acknowledgements.....	205
9 References.....	206
10 Appendix.....	219
