Abbreviations xiii

1. Introduction 1
1.1. Contributions . . . 3
1.2. Organization of the Thesis . . . 4

2. Fundamentals 5
2.1. Radar Fundamentals . . . 5
2.2. Topologies . . . 6
2.3. FMCW Radar . . . 6
2.4. Passive Radar . . . 10
2.5. The Ambiguity Function . . . 13
2.6. Beamforming . . . 15
2.7. Array Modelling . . . 16
2.8. Kalman Filter . . . 17
2.9. Non-linear Extension of the Kalman Filter . . . 28
2.9.1. Extended Kalman Filter . . . 28
2.9.2. Unscented Kalman Filter - Sigma-Point Approach . . . 30

3. Passive Coherent Receiver Hardware 35
3.1. The Software-defined Platform . . . 36
3.1.1. Hardware Description . . . 37
3.1.2. Synchronization of the Analog Front-ends . . . 37
3.1.3. Switchable LNA Front-ends . . . 38
3.1.4. Synchronization of the ADCs and FPGAs . . . 39
3.1.5. Calibration . . . 40
3.1.6. Measurements . . . 41
3.2. Antennas . . . 41
3.3. Noise Figure . . . 44
3.4. Conclusion . . . 46

4. Passive Radar Signal Processing 47
4.1. System Selection and Preliminary Considerations . . . 47
4.1.1. Transmitter Characteristics . . . 48
4.1.2. Separation of the Reference Signal . . . 49
4.2. Signal Processing . . . 49
4.2.1. AGC . . . 51
4.2.2. Illuminator Selection and Calibration . . . 51
4.2.3. Beamforming . . . 51
4.2.4. Reference Signal Generation - CMA . . . 52
4.2.5. Surveillance Channel Generation - NLMS . . . 53

4.2.6. Range-Doppler Matrix Generation 55
4.2.7. Target Detection - CFAR 56
4.2.8. Interpolation and Target List Generation 57
4.3. Illuminator Locator 60
4.3.1. Introduction 60
4.3.2. Ground Truth Acquisition 61
4.3.3. Implementation of the Illuminator Finder 61
4.3.4. Evaluation of the Methods with Simulated Data 69
4.3.5. Real-world Example 71
4.3.6. Conclusion 76
4.4. Target Tracking 76
4.4.1. Tracking Filter Design 77
4.4.2. Tracking Algorithm 78
4.5. Performance Model 80

5. Performance in a Real-World Scenario **91**
5.1. Scenario Description 91
5.2. Illuminator Performance 92
5.3. Tracking Results 97
5.4. Concluding Remarks 106

6. Summary and Future Work **109**

Appendices **111**

A. 14 GHz FMCW Radar **113**

B. Synchronization of the SDR System using the internal PLLs **121**
B.1. LO generation using the internal PLLs 121
B.2. Phase ambiguities of integer-N PLLs 123

C. Frontend Measurements **125**
C.1. Array Gain Plots 125

D. Passive detection **127**

List of References **129**

Publications **137**

Abstract **139**

Kurzfassung **141**
