Table of contents**1 Introduction and scopes**

1.1	Introduction	1
1.2	Problem statement	3
1.3	Objectives	4

2 Present state of knowledge

2.1	Segmental bridge	6
2.2	Short-line match cast method	15
2.3	Bowing of the match-cast segment	20
2.3.1	Heat of hydration	21
2.3.2	Prediction of temperature development in hardening concrete	28
2.3.3	Heat transfer	32
2.3.3.1	Thermal conductivity	34
2.3.3.2	Convection	35
2.3.3.3	Specific heat	36
2.3.3.4	Thermal diffusivity	37
2.3.3.5	Thermal radiation	38
2.3.4	Thermal expansion of concrete	39
2.3.5	Boundary conditions	42
2.3.6	Setting of concrete	47
2.3.7	Thermal stress development	50
2.3.8	Method of calculating deformation (gap) in match-cast segment	51
2.4	Flange width and shear lag	53

3 Experimental investigations and numerical model of match-cast segments

3.1	The San Antonio “Y” Project	64
3.1.1	Description of measurement program	66
3.2	The Bang Na Expressway, Bangkok	69
3.3	Numerical model of match-cast segments	76

3.3.1	Verification	77
3.3.2	Example of using equivalent moment approach	86
3.4	Influences of concrete properties, geometry and boundary conditions on the match-cast process	90
3.4.1	Effect of width to length ratio (w/L)	90
3.4.2	Effect of concrete type	93
3.4.3	Change of the ambient conditions	95
3.4.4	Use of insulating plastic materials	101
3.5	Summary	104
3.6	Model to estimate the temperature gradient	106
4	Experimental investigations and numerical model of the segmental bridge	
4.1	Test span of the segmental bridge of the Second Stage Expressway System (SES)	110
4.2	Numerical model of SES segmental bridge	115
4.2.1	Numerical model	115
4.2.2	Material properties used in the FE model	116
4.2.3	Verification	118
4.3	Bowing effect on the segmental bridges	121
4.3.1	Bridge loads and load arrangement	121
4.3.2	Long-term loads	126
4.3.2.1	Creep of concrete	127
4.3.2.2	Shrinkage of concrete	128
4.3.2.3	Extension of the Ansys creep	131
4.3.3	Numerical results	133
4.3.3.1	The SES numerical results	133
4.3.3.2	The numerical results of Bang Na segmental bridge	143
4.4	Recommended design and construction approaches	156
5	Summary and conclusion	159
