Contents

| | |
|---|--------------|
| Figures | xvii |
| Tables | xix |
| Variables | xxi |
| Abbreviations | xxiii |
| 1 Introduction | 1 |
| 1.1 Motivation and Objectives | 1 |
| 1.2 Course of Investigation | 6 |
| 2 Data and LGD Estimation | 8 |
| 2.1 Data | 8 |
| 2.2 LGD Estimation | 10 |
| 2.3 Prediction Accuracy Measurements | 17 |
| 3 Heterogeneities among LGD Distributions: The Modality Defines the Best Estimation Method | 19 |
| 3.1 Fundamentals and Research Questions | 19 |
| 3.2 LGD Estimation and Cluster Analysis | 21 |
| 3.2.1 Data | 21 |
| 3.2.2 LGD Estimation Methods | 23 |
| 3.2.3 Clustering and LGD Distribution Analysis | 24 |
| 3.3 Comparative Analysis | 26 |
| 3.3.1 Model Comparison Procedure | 26 |
| 3.3.2 Hyperparameter Tuning | 27 |
| 3.3.3 Empirical Results | 31 |
| 3.4 Robustness Checks | 35 |
| 3.4.1 Inclusion of Enterprise-specific Variables | 36 |
| 3.4.2 Clustering based on Loan-specific Variable | 38 |
| 3.4.3 Logarithmic Transformation of the Positively Skewed Unimodally Distributed LGDs | 41 |
| 3.4.4 Non-European Credit Portfolios | 43 |
| 3.5 Interim Results | 45 |

| | |
|---|-----------|
| 4 Tuning White Box Model with Black Box Models: Transparency in LGD Modeling | 46 |
| 4.1 Fundamentals and Research Questions | 46 |
| 4.2 Model | 50 |
| 4.3 Monte Carlo Experiment | 52 |
| 4.3.1 Data | 53 |
| 4.3.2 Optimized Regression Model | 53 |
| 4.3.3 Model Comparison | 55 |
| 4.4 Empirical Framework | 57 |
| 4.4.1 Data | 57 |
| 4.4.2 Competitive Methods | 60 |
| 4.4.3 Empirical Setup | 61 |
| 4.5 Empirical Results | 62 |
| 4.5.1 Variable Selection for Optimized Linear Regression | 62 |
| 4.5.2 In-sample Results | 64 |
| 4.5.3 Comparative Analysis | 69 |
| 4.6 Robustness Checks | 72 |
| 4.6.1 Change in the Split Ratio | 72 |
| 4.6.2 European Credit Portfolio | 74 |
| 4.7 Interim Results | 75 |
| 5 Machine Learning-Based Variable Selection for Clustered Credit Risk Modeling | 77 |
| 5.1 Fundamentals and Research Questions | 77 |
| 5.2 Optimized Clustered Model | 80 |
| 5.3 Empirical Framework | 82 |
| 5.3.1 Data | 83 |
| 5.3.2 Competitive Modeling Approaches | 83 |
| 5.3.3 Empirical Setup | 85 |
| 5.4 Empirical Results | 85 |
| 5.4.1 Variable Importance Measure | 85 |
| 5.4.2 Cluster Analysis | 87 |
| 5.4.3 Comparative Analysis | 90 |
| 5.5 Robustness Check | 92 |
| 5.6 Interim Results | 97 |
| 6 Conclusion | 98 |
| 6.1 Summary | 98 |
| 6.2 Outlook | 100 |
