Table of Contents

A	Introduction	1
1	Quality	1
2	Health-promoting substances	2
2.1	Secondary plant metabolites	2
2.1.1	Polyphenols	4
2.1.1.1	Structure	4
2.1.1.2	Phenolic acids	5
2.1.1.3	Flavonoids	5
2.1.1.4	Function in plants and antioxidant properties	6
3	Health-affecting substances	7
3.1	The apple allergen Mal d 1	7
4	Pathogenesis-related proteins	8
5	Objective of the study	9
6	References	10
B	Polyphenol content and antioxidant capacity of apple fruit: effect of cultivar and storage conditions	15
1	Introduction	15
2	Materials and methods	16
2.1	Plant material and storage conditions	16
2.2	Preparation of extracts	17
2.3	Analysis of antioxidant capacity and total phenol content	17
2.4	Statistical analysis	18
3	Results	19
4	Discussion	24
5	References	27
C	Bioactive components in apple fruit - the influence of harvest maturity and storage conditions	31
1	Introduction	31
2	Materials and method	32
2.1	Plant material	32
2.2	Extraction of secondary plant metabolites and assays for polyphenol content and antioxidant capacity	33

2.3	Extraction of ascorbic acid and analysis of ascorbic acid content	33
2.4	Statistical analysis	34
3	Results	34
3.1	Phenolics	34
3.2	Ascorbic acid.....	35
3.3	TEAC	37
3.4	Correlation analysis.....	38
4	Discussion	40
5	References	42
D	The apple allergen Mal d 1: Effect of cultivar, cultivation system and storage conditions	46
1	Introduction	46
2	Material and methods	47
2.1	Plant material and harvest	47
2.2	Preparation of extract	48
2.3	Sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE).....	48
2.4	Protein determination	48
2.5	Antibodies	49
2.6	Sandwich- Enzyme-linked-Immunosorbent-Assay (ELISA).....	49
2.7	Statistical analysis	49
3	Results	50
3.1	Validation of extraction and Mal d 1-ELISA.....	50
3.2	Cultivar ranking and influence of orchard on Mal d 1 content	50
3.3	Organic versus integrated production	52
3.4	Storage experiments	53
4	Discussion	54
5	References	57
E	Effect of harvest maturity on Mal d 1 content and polyphenoloxidase activity at harvest and during storage	61
1	Introduction	61
2	Material and methods	62
2.1	Plant material and storage conditions.....	62
2.2	Preparation of protein extracts	63
2.3	Extraction of PPO.....	64
2.4	PPO assay	64

2.5	Protein determination	64
2.6	Antibodies	64
2.7	Sandwich-ELISA	65
2.8	Statistical analysis	65
3	Results	66
3.1	Validation of Mal d 1 ELISA.....	66
3.2	Mal d 1	66
3.3	PPO.....	67
3.4	Correlation analysis.....	69
4	Discussion	69
5	References	72
F	The impact of 1-MCP treatment on Mal d 1 synthesis during storage of apple fruit.....	76
1	Introduction	76
2	Materials and methods	77
2.1	Plant material and treatment.....	77
2.2	Preparation of extracts.....	78
2.3	Protein determination	78
2.4	Antibodies	78
2.5	Sandwich-ELISA	78
2.6	Statistical analysis	79
3	Results	79
4	Discussion	81
5	References	84
G	Summary and conclusion	88
