## List of contents

Kurzfassung	iii
Abstract	vii
List of contents	xi
List of units, abbreviations and symbols	xiv
<b>1 Introduction</b>	<b>1</b>
<b>2 Material and methods</b>	<b>8</b>
2.1 Production, chemical analysis and anion exchange capacity of the LDH mineral	8
2.1.1 Production of the LDH	8
2.1.2 Chemical analysis of the LDH	8
2.1.3 Determination of the nitrate exchange capacity of the LDH	9
2.2 Experimental set ups	10
2.2.1 Laboratory experiments in aqueous solutions	10
2.2.1.1 Nitrate adsorption isotherms	10
2.2.1.2 Selectivity for anion adsorption on the LDH in a simulated soil solution	11
2.2.1.3 Repeated nitrate adsorption and desorption on the LDH	11
2.2.2 Soil and plant pot experiments	12
2.2.2.1 Physical and chemical characteristics of the soils	12
2.2.2.2 Determination of the soil nitrate gradients from the LDH surface	13
2.2.2.3 Nitrate adsorption on the LDH in soil	13
2.2.2.4 Long-term stability of the LDH in soil	14
2.2.2.5 Long-term pot trials under greenhouse conditions	15
2.3 Soil and plant extraction and analytical methods	20
2.4 Structural analysis of the LDH	22

2.5	Data analysis and statistics	23
<b>3</b>	<b>Results and discussion</b>	<b>24</b>
3.1	Characterization of the nitrate adsorption and desorption properties of the LDH mineral in aqueous solutions and in soil	24
3.1.1	Nitrate adsorption isotherms in aqueous solutions	24
3.1.2	Selectivity for nitrate adsorption in a simulated soil solution	25
3.1.3	Repeated nitrate adsorption and desorption properties in aqueous solutions	27
3.1.4	Influence of increasing LDH application rates on the equilibrium nitrate concentration in aqueous solution	32
3.1.5	Investigations on the nitrate diffusion towards LDH particles	33
3.2	Evaluation of the nitrate adsorption and desorption capacity of the LDH during several cropping and fallow periods	38
3.2.1	Influence of increasing LDH application rates on plant N uptake and nitrate-N content in soil solution at harvest	38
3.2.2	Nitrate adsorption on LDH during a fallow period and influence on nitrate-N leaching losses	42
3.2.3	Evaluation of the long-term nitrate exchange capacity of the LDH under cultivation	45
3.3	Long-term stability of the LDH under non-cropped and cropped conditions	56
3.3.1	Evaluation of the long-term LDH stability under non-cropped conditions	56
3.3.1.1	Influence of soil pH on the long-term stability of the LDH	56
3.3.1.2	Evaluation of the influence of LDH particle density on the long-term stability and nitrate adsorption capacity	58
3.3.2	Evaluation of the long-term LDH stability under cropping conditions	64

3.4 Investigations of the structural changes of the LDH under cropped conditions and effects on the nitrate adsorption capacity	69
<b>4 General discussion</b>	<b>74</b>
<b>5 Conclusions and practical applications</b>	<b>86</b>
<b>6 References</b>	<b>89</b>
<b>7 Annexes</b>	<b>101</b>
